

TOOL FOR DEVELOPING EMOTIONAL INTELLIGENCE IN CHILDREN

Yanitsa Chukanska, Veselina Naneva, Gergana Koleva

Abstract. *This paper presents a software application to support the development of emotional intelligence in children, including those with special educational needs. The main advantages of the presented system are its adaptability and ability to always provide original content through the use of text-to-image models. The system tracks the development of each learner and provides analytical information to pedagogical specialists. The product is intended to be used together with pedagogical specialists, parents and guardians of children.*

Key words: Emotional Intelligence, Children, Adaptability.

Acknowledgments

This study is supported by the project FP25-FMI-010 “Innovative interdisciplinary research in informatics, mathematics and educational pedagogy” at the Paisii Hilendarski University of Plovdiv.
